

T3 Service and Hire

Bennex Aberdeen has the capability to fully service and repair all T3 manipulator systems. This is carried out by fully trained service engineers with the backing of a vast stock of spare parts to ensure a very quick turn round of the customer's equipment. The work is carried out in a specially prepared workshop complete with all the required special tooling.

Bennex Aberdeen also operates a fleet of T3's that can be hired to support customer's contracts. These systems come fully prepared and include spares suitable for remote or local operations.
